

EXTENSIONS

Extensions are a customized service that can add length, thickness, or both to your hair. Our stylists are trained in different applications, including Tape-In and Hand-Tied techniques. We use only ethically sourced human hair for a top-of-the-line luxury result.

Because of the customization of this service, a consultation is required prior to your first installation. During the consultation your stylist will expertly match your hair color as well as discuss which technique is best for your desired result.

Price varies, depending on length of hair, how much hair, and what technique is used.
